

RAAVI PRANAY

Software Developer | Full-Stack Engineer | AI Applications
Vijayawada, Andhra Pradesh

[+91-9346876340](tel:+919346876340) pranayraavi23@gmail.com [LinkedIn](#) [GitHub](#) [Portfolio](#)

PROFESSIONAL SUMMARY

Software Developer with 1+ year of industry experience building enterprise-grade SaaS and On-Premise systems. Shipped AI-driven automation platforms, License Management architecture, and intelligent workflow applications for enterprise users. Strong experience across **Next.js**, **React.js**, **FastAPI**, **MongoDB**, REST APIs, RAG pipelines, and end-to-end frontend-backend integration.

EDUCATION

Karunya Institute of Technology and Sciences
B.Tech in Computer Science and Engineering
CGPA: 6.62

May 2025

EXPERIENCE

Software Developer

2025 – 2026

Nainovate Technologies Pvt Ltd, Hyderabad

License Management Service (SaaS & On-Prem Deployment)

- Designed and shipped a complete License Management System for the company's enterprise AI automation platform.
- Built **Next.js** frontend modules and backend services for customer onboarding, product key assignment, and license generation.
- Implemented license workflows supporting both **SaaS** multi-tenant and **On-Premise** air-gapped deployment models from a single codebase.
- Developed environment-aware license configuration and deployment validation logic enforced at install time.
- Integrated the license service with the company's Automation Workflow and Personalized AI platform.

BuildX Procurement Platform

- Developed backend services using **Python** and **FastAPI** for RFP creation, bid management, and procurement automation.
- Designed and optimized **MongoDB** schemas with proper indexing for efficient data handling under realistic procurement workloads.
- Built and integrated REST APIs ensuring seamless frontend-backend communication.
- Implemented PDF generation and an AI-driven RFP generation module that cut manual authoring time.
- Performed API testing and documentation using **Postman**.
- Contributed to React-based frontend integration for dynamic rendering of RFP and bid workflows.

AI Decision Workspace

- Developed AI-powered frontend modules using **Next.js** and **React.js** for enterprise workflow automation and intelligent decision support.
- Built an AI assistant feature integrating Freshdesk ticket data, knowledge base documents, and agent context for grounded, contextual response generation.
- Worked on Retrieval-Augmented Generation (**RAG**) pipeline concepts including semantic search, document retrieval, and context-aware AI responses.
- Developed dynamic interfaces for AI search, workflow execution, and dashboard visualization.
- Integrated REST APIs and optimized frontend-backend communication for real-time AI-driven responses.
- Built reusable UI components and mock-data driven interfaces for scalable frontend development.

PROJECTS

Electric Vehicle Range Prediction using Machine Learning

2024

- Built regression models to predict EV range and analyze pollution metrics.

- Applied feature engineering and preprocessing techniques to improve model accuracy.
- Tech Stack: Python, scikit-learn, pandas, matplotlib.

AI-Powered Rootkit Detection using Stacked Ensembles

2024

- Developed a cybersecurity detection system using stacked ensemble machine learning techniques.
- Classified malicious system behavior with improved detection performance over single classifiers.
- Tech Stack: Python, scikit-learn, ensemble learning.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Frontend: Next.js, React.js, HTML, CSS, Tailwind

Backend: FastAPI, Python, REST APIs

Databases: MongoDB, PostgreSQL

Generative AI: LLM Basics, RAG Pipelines, Semantic Search, Context Retrieval

Data & Analytics: Power BI Dashboarding, Data Visualization

Tools: Git, GitHub, Postman, Docker (Basic), VS Code

CERTIFICATIONS

- Google – Data Analytics
- Microsoft – Azure Data Fundamentals
- NPTEL – Industry 4.0 and Industrial IoT
